

Instructions for Banner

Instructions

1. Set your print quality to Best.
2. Decide what you want your banner to say and edit the text in the project artwork (pages 1–4). Click on each existing letter, delete, and type in your own letters, one per page. If your banner is long or has several words, re-edit the artwork and continue printing until you have all your letters. Use the baby carriage artwork (page 5) to frame the banner or separate words.
3. Allow to dry completely.
4. Place the artwork on the cutting mat and use your metal-edge ruler and X-ACTO knife to trim away the white areas. Or, cut with scissors.
5. Punch holes on the side of each letter and tie together with ribbon or yarn.
6. You can also display your banner in a variety of other ways:
 - Hang a line and use clothespins to suspend to each letter
 - Attach to a wall or mantel with tape

Materials

- 1 sheet of standard paper (such as HP Premium Inkjet Paper or HP Photo and Project Paper, matte) for each letter in your banner
- Metal-edge ruler
- X-ACTO knife
- Cutting mat
- Scissors
- Ribbon or yarn
